

Dear Campus Community,

Unprecedented challenges call for unprecedented solutions. This is the mindset the Capitol Tech community has been built upon. Our faculty and staff are hard at work continuing to implement various new online learning experiences as well as new ways to connect with Capitol Tech's current students, future students, and past graduates.

Capitol Tech's history has proven we are ready and willing to make changes based on circumstances, technological innovations, and the ability to better serve our community. To this end, Student Life is available to answer impromptu questions or provide support using [GroupMe](#), a free app; through the Student Life Text Number (240-712-4133); or on social media. For scheduled online events, students can reach Student Life and fellow students during live Zoom Q&A sessions or by scheduling a virtual meeting during online office hours which run from 9 a.m. to 3 p.m. on weekdays.

Prospective students and their parents can speak with university leaders through their own designated channels. The university's [Admissions team](#) has implemented an appointment system for future students and their families to connect with knowledgeable admissions staff in addition to offering virtual office visits with undergraduate admissions staff through Zoom. Admissions information can also be found through the newly created Admissions Takeover of [Capitol Tech's Instagram page](#) every Thursday. Admissions counselors and ambassadors will share their experiences and field questions from prospective students about life at Capitol Tech. In the near future, virtual alumni panels and virtual open houses will launch to allow prospective students to gain insight on their future at and after Capitol Tech.

Current and prospective students can rest assured that when they become Capitol Tech alumni they will remain updated on current Capitol Tech events and initiatives. Along with the continuation of the Capitol Connector, a monthly e-newsletters on Capitol Tech's current achievements, these working professionals can now further their Capitol Tech education through a new series of webinars called [Cap Tech Talks](#). These webinars, the first of which will launch on Tuesday, April 21, will be hosted by industry experts focusing on current challenges they've faced in the field and the ways in which they resolved these issues.

While COVID-19 may have halted or slowed some businesses, Capitol Tech has dug deep to [our roots](#) to continue reaching our goals and each of you who comprise our Capitol Tech community.

Brad Sims, PhD  
*President, Capitol Technology University*
